Shortfall

Resolve invoice exceptions as receiving records change

Review the evidence.
Approve the current amount.

Huzyefah Wasim

Vultr Future of Work challenge

The work behind an invoice exception

A late receipt means another round of checking and explaining.

Manual review	With Shortfall
Find the invoice, order, and receipts	Inspect source fields and their quotes
Recalculate when receiving changes	Review the recalculated discrepancy
Explain the decision to the next reviewer	Read the assigned task and case history

Expected time benefit Less searching, repeated arithmetic, and handover work.

Existing accounting products offer matching controls. Review time savings still need operator measurement.

A late receipt changes the decision

120 units invoiced at $40 each. Invoice total: $4,800.

Before the receipt

100 units received

$800

proposed hold

10 more units

After the receipt

110 units received

$400

current discrepancy

Old $800 approval rejected

The ledger stays unchanged.

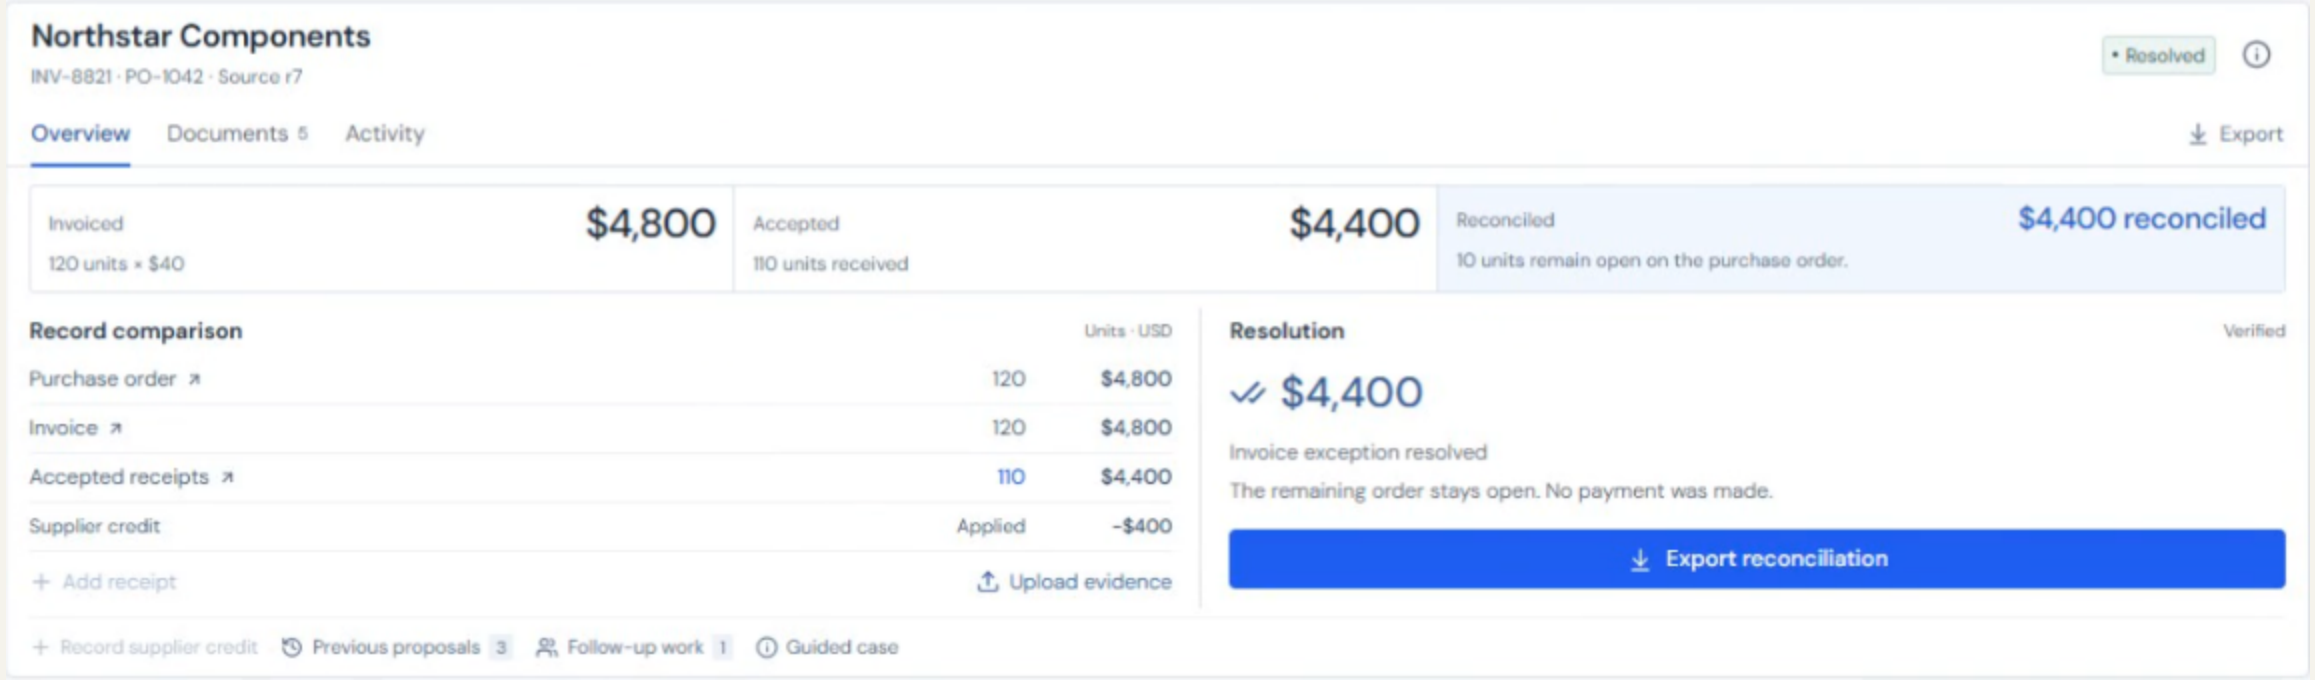

The correction stays traceable

Approve the $400 hold. Verify a $400 supplier credit. Approve credit and release.

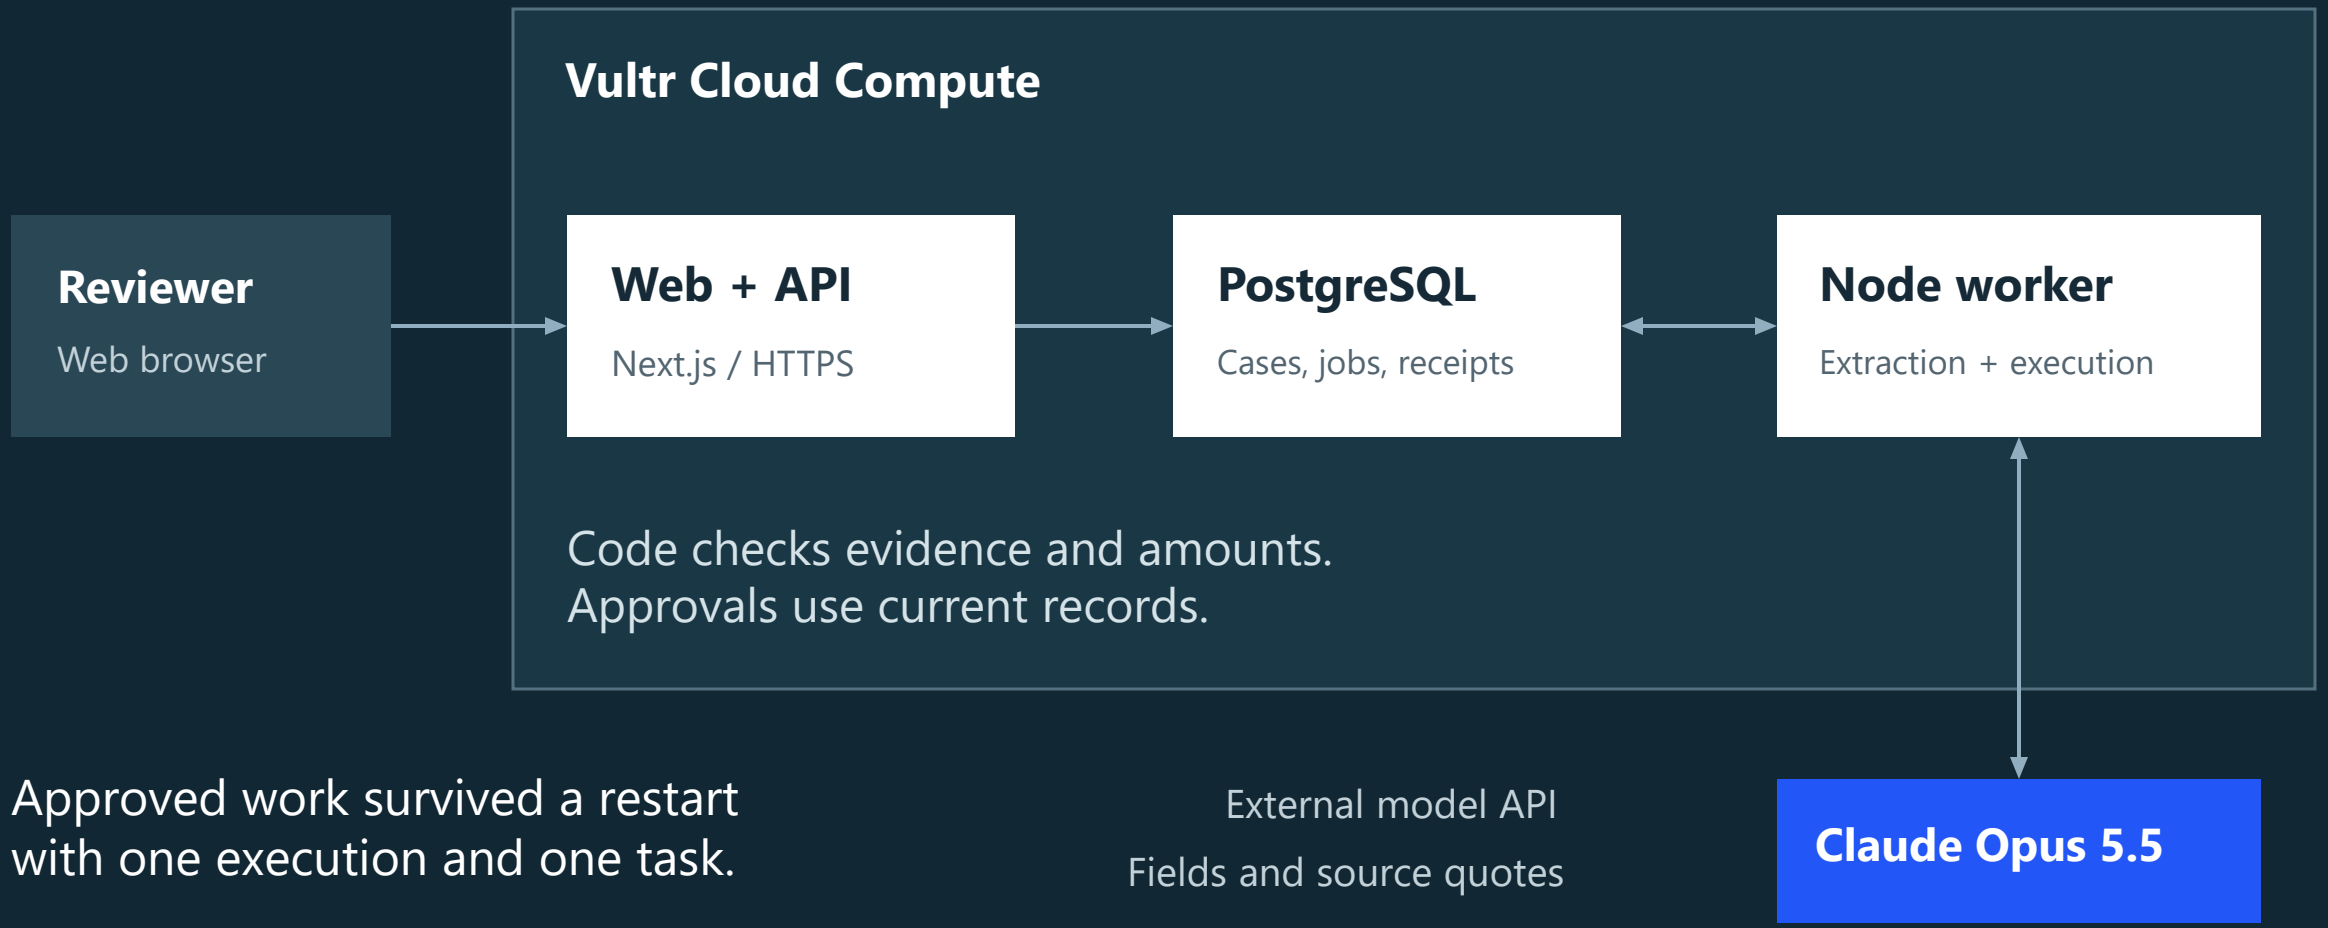

$4,400
Net invoice

$0
Held amount

10
Order units still open

Vultr runs the workflow

Approved work survived a restart with one execution and one task.

Evidence from three separate test sets

Original baseline

24 documents

9/12 supported accepted

3 sent to review

12/12 risk cases met expected outcomes

CSV correction

3 targeted reruns

3/3 accepted

24/24 fields correct

Same inputs rerun after a validator fix

Fresh CSV cases

4 new documents

2 accepted

18/18 fields correct

2 sent to review as expected

28 unique documents **31 model calls** **$0.47 model cost**

Synthetic records and project labels. No independent reviewer.

The business case for a finance team

Expected value

Less staff time

Find cited values and review calculated amounts.

Fewer overpayments

Check received quantities before approving.

Fewer missed credits

Keep the credit, approval, and result in one case.

Proposed buyer

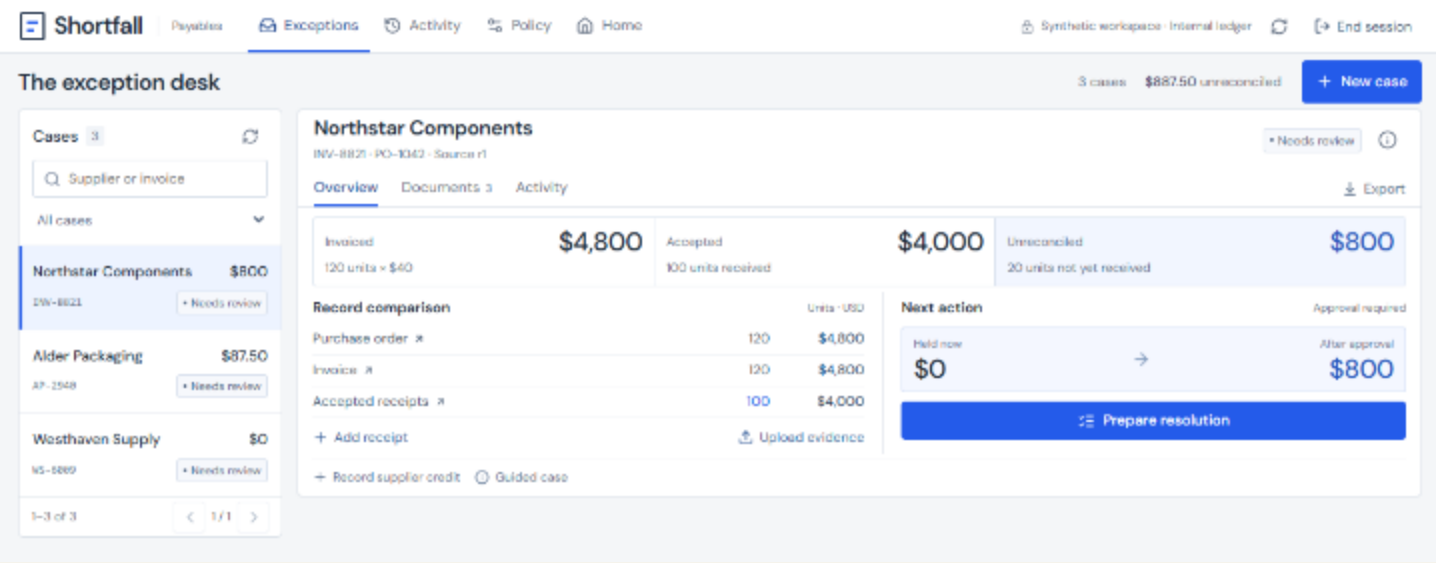

Finance manager at a small distributor

$99

per workspace / month
Price to test with operators

Next: measure review minutes and correction errors on comparable cases.

Try a case, then inspect the result

Open the live application

Choose a sample or create a case.
Inspect evidence and approve.
Export the reconciliation.

Public repository
